## About Me

💻 Hello, I'm Erfan Shokrollahzadeh, and I'm a full-stack software Engineer with a passion for empowering projects using Python and Django technology. Over the years, I've developed a deep understanding of both front-end and back-end development, allowing me to take on projects.From 2017 got to know the computer and introduced the programming from 2019 and until I love this lovely career right now.

🎉 I was born in 2001 in Tehran; My work in the field of programming and IT I started in 2019 and from 2021 professionally entered this field I became, now, after 2 years after the experience and techniques of programming and E -marketing is ready to be able to make big projects and To implement great ideas.

💫 But what truly sets me apart is my ability to learn. So much so that if I want a new skill, I'll start. I repeat that skill from the beginning to the end. It's even been many times. And also for the skills I've already trained and mastered. Again, I start from the base to review the content. And also my high morale is an advantage to help and guide other people.

📜 I'm a computer science student from Iran and I'm willing to learn Python. My journey to Python started four months ago when I was searching for web develope. At the moment, I am self-taught. An example of my small projects is on my GitHub page.I always trying to learn something about programming...

## Projects

Sep 2019 – Present

**Click on this link to see more work sample**
I have been working professionally since 2021.
I have some important projects on my GitHub and online resume.

Nov 2025 – Jan 2026

**Global trades**
*Import products from others countries*
A modern, fully static marketing website for **ExportsO** — a business that imports premium produce and artisan goods from Pakistan (and Iran) into the Turkish market.
Built with **Next.js 16**, **Tailwind CSS v4**, and **TypeScript**. No backend, no database, no payment gateway — just a fast, SEO-friendly static site deployable anywhere.

Aug 2025 – Oct 2025

**ZENTIME**
*Watch online store*
A full-stack e-commerce starter combining a Next.js 15 frontend and a Django 5 REST API backend.
